

ecoBETA a/s
Staunvej 29
DK-9240 Nibe.

Copenhagen. 25 Mar. 09

Re.: ecoBeta – duo flushing toilet.

Situated in an officebuilding housing 8 floors with total of 65 toilet age group 3 -5 years all equipped with duo-flus i.e. two-knots systems; we are having rising problems in defects.

We have seen rising cost of repair: problems with shut down toilets waiting for plumber.

All of this caused by lime stone that adhere to the clucky constructet flushing device; resolving running water and water wastage.

With the new installed heavy **One-flush water-valve + ecoBETA duo flushing**, we avoid heavy maintainace cost and are reducing water wastage.

ecoBETA means for us a significant better economical situation.

Kind Regards,

Eric Nielsen.
